Revision History:

Revision	Date	Software Version	Description of Change
1.1	14 March 2006	2.39.13 FE or higher	F1 and F2 codes added to 'Remote control keycodes' section and Zoom and Focus codes moved to 'Direct access codes' section.
1.0	14 October 2004	2.39.13 FE or higher	Initial version.

1. Introduction

This document describes the communication and data formats used to control SIM2 HT 300E / HT 280E projectors via RS-232C port.

2. Connection

Switch off your Personal Computer and Projector before connecting RS 232C cable.

Use a standard serial cable with 9 pin female to the Personal Computer and 9 pin male to the Projector: pin 2 connects to pin2, pin 3 to pin 3 and pin 5 to pin 5.

SIM2 HT 300E / HT 280E RS-232C Port is described as follows.

SIM2 HT 300E / HT 280E RS-232C Control Port:

D-SUB 9-pin (female)	Pin No	Signal	Definition
		1	N/A
2		TD	Transmit data
3		RD	Receive data
4		N/A	Not used
5		GND	Ground
6		N/A	Not used
7		N/A	Not used
8		N/A	Not used
9		N/A	Not used

Switch on the Personal Computer and, after start up, switch on the Projector.

Load a suitable communication software onto your Personal Computer, and set the Serial Port Parameters as shown below.

Communication Parameters:

Parameter	Value
Transfer Rate	19200 bps
Data Bits	8
Parity Bit	None
Stop Bit	1
Flow Control	None

Set Send Mode and Read Mode to HEX.

3. Communication Protocol

The communication protocol is packet oriented. Packets consists of Header and Payload.

There are two types of packets: Event and Operation.

The packet header size is fixed (7 bytes), while the packet payload type and content varies based on the type of packet: Event payload size is 6 bytes, while Operation payload size is 25 bytes.

The entire packet size is variable, being the sum of the fixed-size packet header and variable-sized packet payload: Event packet size is 13 bytes and Operation packet size is 32 bytes.

Each packet received by the projector is acknowledged with a return code:

- 06: Acknowledged with no error
- 15: Acknowledged, but an error has occurred.

Header

All Packets use the same Packet Header format.

The Packet Header size is fixed at seven bytes.

0	1	2	3	4	5	6
BE	EF	Packet Type	Packet Payload Size		Packet Checksum (CRC)	

0xEFBE is a fixed value that is used to insure packet alignment if there are partial packets received or byte lost. The ls-byte of the word 0xBE is sent first, then the ms-byte 0xEF.

The **Packet Type** is a number (a byte in length) that defines the type of data in the packet.

The **Packet Payload Size** is a number (two bytes) that defines the size of the payload portion of the packet.

For a given Packet Type, Packet Size is fixed.

The **Packet Checksum** (two bytes) is the CRC value for the entire packet (Header and Payload).

Payload

The packet payload format depends on the packet type.

The Event packet payload size is 6 bytes, while the Operation packet payload size is 25 bytes.

Event Packet Format:

0	1	2	3	4	5
Event		00	00	00	00

Operation Packet Format:

0	1	2	3	4	5	6	7	8	9	10	11	12
Op Type	Operation ID		00	00	Target		Operation Value				00	00
13	14	15	16	17	18	19	20	21	22	23	24	
00	00	00	00	00	00	00	00	00	00	00	00	

4. Commands

Remote Control Keycodes

The following commands send simulated Remote Control input to SIM2 HT 300E / HT 280E projectors.

Remote Control Keycodes:

⁽¹⁾ When the unit is in Stand-by state, this command switches on the unit and the last source memorised prior to switch off is automatically selected.

⁽²⁾ When the unit is in Stand-by state, this command switches on the unit and selects the corresponding Source.

Operation Codes

The following codes provide direct access to SIM2 HT 300E / HT 280E User Interface operations not accessible via a single Remote Control command.

Operation Codes:
